

HOW TO WEAR YOUR SNOOD AS A FACE COVERING

Easy Steps For Putting On Your Snood

1

Pull the snood over your head in a single layer.

(This allows for the most stretch.)

2

Pull it down so it sits around your neck.

3

Pull the top of the snood up over your nose.

4

Adjust the back to the base of your crown and above your earlobes.

(Wearing your snood at mid-ear gives you the best fit.)

5

If needed, fold or bunch snood to your desired tightness.

(Bonus: folding your snood adds an extra layer of protection!)
